Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent no. 6,045,076 to Daniels in view of U.S. Patent no. 6,412,722 to Kreuser et al.

Daniels discloses an electrically controllable spool braking unit having a tension detection unit and a spool control unit.

Daniels does not disclose a plurality of magnets and a plurality of serially connected coils and a switch.

Kreuser et al teach a braking mechanism requiring very few moving parts, adapts to varying casting conditions and enables a user to cast a lure or bait a distance substantially identical to the distance achieved by a previous cast.

It would have been obvious to one of ordinary skill in the art to provide Daniels with a braking mechanism as taught by Kreuser et al so that the reel will have very few moving parts,

adapts to varying casting conditions and enables a user to cast a lure or bait a distance substantially identical to the distance achieved by a previous cast.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
